

AIM AT LEAD SAFETY

(please read)

Most ammunition contains lead within the bullet and primer. If you shoot firearms, cast bullets, or reload ammo, you are exposed to lead. Frequent exposure to high levels of lead is hazardous to your health.

REDUCE YOUR LEAD EXPOSURE

AVOID - eating or drinking on the range

AVOID - sweeping fired cases with a broom

AVOID - touching your eyes and mouth

DO - pick up fired cases with a HEPA vacuum or pick up by hand

DO - wash your hands and face as soon as you finish shooting, cleaning your guns, reloading, casting bullets, or picking up fired cases.

For more information please see your health care provider or contact:
